👤 PROFILE

I have a strong background in mathematics and highly motivated MCA student from Jamia Millia Islamia(Batch 2027), growing experience in programming with Java, C, Python, HTML, CSS, and JavaScript. I'm building my skills in DSA, databases, and core computing concepts while learning advanced DSA and Python libraries. I enjoy solving problems, thinking logically, and improving my technical abilities to contribute effectively to real projects.

📁 Projects

AI Hospital Appointment System 🔗

- Built a voice-enabled hospital appointment scheduler using Vapi AI, FastAPI, SQLite, SQLAlchemy, and Streamlit, supporting booking, rescheduling, cancellation, availability checks, and appointment history through AI-driven voice interactions.

WhatsApp Chat Analyzer 🔗

- Developed an interactive WhatsApp Chat Analyzer web application using Python and Streamlit to analyze exported WhatsApp conversations.
- Built a responsive analytics dashboard featuring user activity, message statistics, timelines, emoji analysis, link analysis, word clouds, and activity heatmaps.
- **Technologies:** Python, Streamlit, Pandas, NumPy, Plotly, Matplotlib, Seaborn, WordCloud, Regex, Scikit-learn

Heart Disease Prediction System 🔗

- **Developed** a machine learning-based Heart Disease Prediction System using Python and Scikit-learn, performing data preprocessing, EDA, feature engineering, and classification model evaluation to predict heart disease risk accurately.
- **Technologies:** Python, Pandas, NumPy, Scikit-learn, Matplotlib, Seaborn, Jupyter Notebook, Streamlit

Online Voting & Polling Application 🔗

- **Engineered** a full-stack online voting & polling application using Angular, Spring Boot, and MySQL, enabling secure poll creation, real-time voting, and instant result updates through RESTful APIs.
